

**ALCREA**  
HEALTH

**Capliques®**

Set your brand  
apart with our  
advanced line of  
liquid capsules.

# FORMULATE. CREATE. DIFFERENTIATE.

With proprietary liquid capsule technology and customizable, quality ingredients, Capliques® set your brand apart.

## PROPRIETARY SEALING

Innovative **band-sealing technology** minimizes leakage and mitigates odor while still providing disintegration within 10 minutes. And our **proprietary sealing process** utilizes a proven application that is more natural and doesn't require additional fillers to maintain band integrity.

## ADVANCED CONTENTS

Capliques® can utilize a **two-phase delivery system** that requires less excipients, limits oxidation, and improves bioavailability and absorption rates. Coated beadlets encapsulated in a liquid medium allow for **adjustable time-release profiles** and formulas with otherwise incompatible ingredients.

## CUSTOM BRANDING

From product formulation to marketing, we partner with you to create a supplement that extends your brand. The Caplique® delivery system **lets you view the high-quality supplements inside**. Customized capsule and banding colors, printed logos, and colored beadlet options allow you to distinguish your brand with a unique and recognizable supplement.

## CUSTOM OPTIONS

### 1 Choose beadlet colors and content

- Melatonin
- Caffeine
- Niacin
- Cayenne
- Magnesium
- B-vitamins
- And many more

### 2 Choose liquid carriers

## CAPACITIES

Our GMP-compliant Philadelphia plant is North America's largest volume contract manufacturer of hard, two-piece liquid-filled capsules. With cutting-edge technology, we have the capacity to produce 1.1 billion capsules annually.

- 30,000-square-foot main facility
- 15,000-square-foot off-site warehouse
- Four manufacturing suites
- Two packing lines with turnkey operations on site
- Onsite bottling and carton machine
- Ability to run small R&D samples prior to full scale production
- Capsule compatibility testing

---

## QUALITY ASSURANCE

In addition to complying with national and international regulations, we take it upon ourselves to submit our nutritional supplements to chemical, physical, microbial and heavy metal analyses, and do pesticide and solvent residue analyses where appropriate. We use only the highest-grade ingredients and live by a near fanatical commitment to quality.
