## Liquids

Differentiate  
your brand with  
liquid nutritional  
supplements

# FORMULATE. CREATE. DIFFERENTIATE.

Liquid nutritional supplements set your brand apart with a wide variety of mediums, tastes and delivery methods.

## ADVANCED CONTENTS

One of the most effective ways to deliver nutrients, liquids can house many ingredients in one dose. Immediate absorption by the body gives them increased bioavailability. And this form also limits the need for fillers used in capsules and various binders, disintegrators and coatings required by tablets.

## DIVERSE BENEFITS

A good-tasting liquid supplement can serve as an alternative for consumers who can't or prefer not to chew or swallow tablets and pills. Liquids can even be stirred into other drinks. And since great taste will increase usage with consumers, we've spent the last 15 years perfecting our flavor technology.

## CUSTOM BRANDING

From product formulation to marketing, we partner with you to create liquid supplements that extend your brand. We build your supplement from the ground up using customized ingredients, tastes, colors and delivery methods to create an exclusive, high-quality product as distinct as your brand.

## CUSTOM OPTIONS

- 1 Choose your product
  - Shots (energy, calming, sleeping, etc.)
  - Functional beverages
  - Vitamin & mineral supplements
  - Protein extracts
  - Fish oil
  - Marine liquid cartilage extracts

## CAPACITIES

Our GMP-compliant Quebec plant is designed to meet the needs of our customers. We have the ability to produce 22 million bottles of liquid nutraceuticals each year, and can accommodate small batch and run sizes.

- Bottling rate of 5,000 per hour
- Mixing rate of 100,000 KG per month
- Multi-level batch size capabilities, from 50 to 5,000 L
- Multi-level conditioning capabilities, from 5 ML to tons
- Large pressure filter capability
- Microfiltration capability
- Ceramic ultrafiltration capability
- Oil filling capacity (Nitrogen flushed, proprietary antioxidant blend)
- High-quality USP purified water system

---

## QUALITY ASSURANCE

In addition to complying with national and international regulations, we take it upon ourselves to submit our nutritional supplements to chemical, physical, microbial and heavy metal analyses, and do pesticide and solvent residue analyses where appropriate. We use only the highest-grade ingredients and live by a near fanatical commitment to quality.
